## EXPERIENCE

### Kampaniyam, Azerbaijan Based Startup, — Full time Strong Junior Full Stack Developer

September 2021 - PRESENT

#### Front-End (React.js)

Implementing Virtual Scroll for rendering large DataSet for minimizing costly DOM operations.

Controlling states using Redux Toolkit and Redux Persist.

Implementing header which is controlled by local storage.

Implementing Real time search bar with Redux and Axios. (Retrieving data from backend based on user search in real time).

Implementing Figma Design using CSS and styled Component .

Implementing Admin Panel from scratch

#### Back-End(Node.js)

Using MongoDB in CRUD operations.

Design Restful API and use it.

Optimisation of modules using appropriate data structures.

### UNDP SDG AI Lab Community Member, Remote — Volunteer

September 2021 - May 2022

Helping team as a Front-End developer using React.

Cleaning raw data using python libraries.

### Bilkent University, Ankara — Teaching Assistant

September 2020 - May 2021

Provided feedback and guidance to students. Helping them to solve their Lab using Python (Pandas and Numpy).

## EDUCATION

### Bilkent University, Turkey/Ankara — Computer Science

September 2015 - January 2022

Bachelor of Science in Computer Engineering.

## Achievements

- 100 % Scholarship by Bilkent University

## SKILLS

Language: Javascript,Python

Library: React, Pandas, Numpy , Redux

Others: Nodejs, CSS, Styled Component, axios

## Research Interest

Artificial Intelligence

Machine Learning

Dynamic Programming

Blockchain

## LANGUAGES

English (Upper Intermediate)

Turkish (Native)

Azerbaijani (Native)

Russian (Pre Intermediate)
